

# CENTAUR

**TIME AND LABOR-SAVING NO RINSE STRIPPER**  
**NO ENJUAGUE REMOVEDOR DE ACABADOS DE PISO**

## Technical Data

### Areas of Use

An emulsifying stripper that removes heavy buildup and multiple coats of burnished finish without the need for mechanical agitation or flood rinsing.

- Hospitals, nursing homes, doctors offices
- Schools, universities, child care centers
- Malls, retail stores, supermarkets

### Specifications

Available Sizes .....	4/1G, 5G, 55G
Physical State .....	Liquid
Color .....	Clear Yellow
Fragrance .....	Glycol Ether
Ammoniated .....	No
Viscosity .....	Thin
Foam .....	Low
Water Based .....	Yes
Emulsifier .....	Extra Heavy Duty
Flash point .....	Nonflammable
Specific Gravity .....	0.996
pH (undiluted) .....	11.6

#### HMIS Hazard Rating

Health .....	2
Flammability .....	0
Reactivity .....	0
Personal Protection .....	C

### What the Pros Know

Limit stripping area to one which can be stripped and wet vacuumed before evaporation starts. Flooding too large an area may require another stripper lay down and require more time.

**ON HEAVY SOILED FLOORS:** After wet vacuuming, damp mop the floor to insure all residue is gone. Size of stripping area should be determined by crew size and equipment available.

- No-Rinse formula - Eliminates flood rinse
- Speed stripping action - Requires no agitation
- Heavy duty emulsifier - For the toughest floor finishes
- Non-ammoniated - No harsh ammonia odor
- No harsh caustics - More user friendly
- Water-based - Safe for most floors
- Versatile - Use on resilient floor, terrazzo and concrete

This true no-rinse stripper is formulated to save time, thus saving money. It will quickly penetrate, emulsify, and liquefy multiple layers of floor finish for complete removal. Using a unique combination of ingredients this speed stripper contains no caustics and cannot leave harsh alkaline residues. Eliminating alkaline residue greatly improves finish adhesion, thus reducing the chance of powdering and poor wear. Caustic strippers can create a slippery mess and are harsh to skin, causing concern for worker safety. This product uses a concentrated solvent system that re-dissolves the floor finish as it breaks the finish loose from the floor. It is designed to be effective without the use of floor machines. It is a "mop on, pick up, no-rinse" stripper. Dissolved finish stays liquefied and does not clog stripping pads.

### Directions

Wear safety equipment recommended on MSDS, place Wet Floor Signs and read all directions and cautions prior to beginning your work.

Light or medium buildup dilute 1:4 (32 ounces per gallon). For heavy build-ups dilute 1:2 (64 ounces per gallon). Apply solution at rate of 150-300 square feet per gallon. Apply enough solution to insure complete wetting.

Allow to stand 5-10 minutes minimum. **DO NOT ALLOW SOLUTION TO DRY.** Re-wet floor as needed.

For best results, remove residue with wet vacuum or auto scrubber. If not possible, use a damp mop for recovery. If mop is used for pick-up, use extreme care to remove all residue and change water frequently.

**No-Rinse  
required**
