What the Pros Know

Quaternary germicides are substantive to the surfaces they clean and disinfect. This means that, even when rinsed, there is a layer of germicide residue remaining. This very small residual becomes active when dampened. This characteristic helps keep bacterially caused odors under control.

- Neutral pH - Safe on finished floors
- Surfactant enhanced - Excellent cleaning capabilities
- Fresh, deodorizing mint scent - Counteracts airborne odors
- Concentrated - Lower cost in use than most products, 2-4 ounces per gallon
- Quat based formula - Can be used as a general disinfectant or hospital grade at correct dilution

Daily, neutral cleaning and disinfecting can be accomplished with this fresh mint product. DC Mint is a quaternary ammonium based disinfectant that is effective against bacteria including *Salmonella Choleraesuis*, *Pseudomonas Aeruginosa* and *Staphylococcus Aureus* on hard surfaces. It is also effective against the HIV-1 (AIDS) Virus.

DC Mint is formulated to clean and disinfect while leaving a fresh, deodorizing, mint fragrance. Ideal for use in virtually all institutional or commercial sanitation programs for the control of disease and odor causing germs. It may be used on virtually all washable surfaces such as porcelain, tile, enamel, metal, resilient floors, laminates and painted surfaces. It will not dull or remove detergent resistant floor finishes.

Directions

Wear safety equipment recommended on MSDS, place Wet Floor Signs and read all directions and cautions prior to beginning your work.

Remove gross soils (labels, gum). Dust mop floor daily. For heavy soil or organic matter, a precleaning step is required.

Use daily or as needed. Dilute this product (2-4 oz. per gal.) with tap water. Clean with mop or auto scrubber to remove spots, spills, and surface soils. Wet surface thoroughly.

Allow to work 10 minutes to assure complete disinfection. Allow to dry. No need to rinse. Replace solution when visibly dirty.
