What the Pros Know

Synthetic detergent hand cleansers keep oils and greases dispersed in the rinse water. This minimizes soap scum and drain sluggishness in hard water areas. A pH balanced hand soap reduces skin drying commonly caused by frequent hand washings.

- Synthetic blend - Creates rich lather
- pH balanced - Does not dry or chap skin
- Uniquely formulated - Doesn't create soap film on wash basins
- Head to toe formula - Gentle cleaning with no greasy feel
- Enhanced with skin conditioners - Moisturizes skin; does not dry or chap skin

Luxurious skin cleansing properties and refreshing lather are combined to provide the ultimate, total hair and body cleaner. This unique, mild, personal care formula gently cleans from head to toe without drying skin or leaving a greasy feel. This product rinses completely without leaving a soap film or residue. It is a pH balanced, no tears formula. It lathers to an excellent quick foam, even in hard water, yet rinses easily leaving the skin feeling clean and refreshed. The pink pearlescent formula with a herbal fresh fragrance is appealing to everyone. Its added emollients keep skin soft without leaving a sticky residue often associated with other types of skin cleaners.
