

## Technical Data

### Areas of Use

Use on any resilient floor. Especially beneficial on worn or porous floor surfaces.

- Restaurants, hotels, motels, offices
- Hospitals, nursing homes, doctors offices
- Schools, universities, child care centers
- Grocery stores, malls, retail stores

### Specifications

Available Sizes .....	4/1G, 5G, 55G
Physical State .....	Liquid
Color .....	Milky White
Fragrance .....	Acrylic
Total Solids .....	14.5%
Metal Interlocked .....	No
Traffic Area .....	Normal-High
Leveling .....	Excellent
Non Yellowing .....	Yes
Specific Gravity .....	1.01
pH .....	8.0

#### HMIS Hazard Rating

Health .....	1
Flammability .....	0
Reactivity .....	0
Personal Protection .....	A

### What the Pros Know

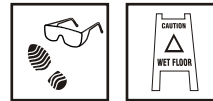

Sealers provide an optimal foundation for the floor finish. Protection against stain penetration is enhanced by use of a floor sealer.

- Milky white - Dries clear, non yellowing
- Water-based - VOC compliant
- Improves finish adhesion - Lower maintenance and repair costs
- Tough protective film - Barrier against abrasion
- Penetrates substrate - Resists stains and soiling

The best way to prepare a floor for long lasting protection against wear, abrasion and staining is with a good sealer. This all-purpose sealer is ideal for use on resilient tile floors, as well as porous interior surfaces such as brick, ceramic, grout, quarry tile, and concrete. NOVA properly applied, will provide an excellent barrier and improve adhesion of floor finishes. It can prevent pitting, flaking and dusting of interior concrete surfaces, thus saving maintenance and repair costs. Can be stripped with emulsifying strippers. Older, worn floor surfaces benefit greatly from the use of a floor seal.

### Directions

Wear safety equipment recommended on MSDS, place Wet Floor Signs and read all directions and cautions prior to beginning your work.

Prepare floors by thoroughly stripping and allowing the surface to dry.

Apply this sealer in even medium coats. Allow the sealer to dry to the touch prior to applying additional coats or top coating with finish. 1-2 coats of NOVA with two (or more if desired) coats of finish will properly protect and enhance the appearance of most floors. A total of 4 to 6 coats of seal and finish combined is recommended.

Stain resistant

Water-based

Tough protective film
