

HAND DRYERS

- Reduce costs by 90% over paper
- Dry hands in 15 seconds

SSS HAND DRYERS

PUSH BUTTON ● HANDS OFF ● XLERATOR

Eliminate 90% of the cost of using paper towels

No mess, no waste disposal, no hassles

The quality line of SSS Hand Dryers is designed to meet all of your hand drying needs. Select from the dependable Push Button models, the automatic Hands Off models or the technologically advanced fast drying XLerator. All SSS Hand Dryers are quality built to provide dependable service with a minimum of maintenance and are backed by the best warranties available.

Push Button

Guaranteed dependability

The traditional hands on style dryer is backed with a 10 year warranty that includes labor and parts *even when the damage is the result of accidents, misuse or vandalism!* The dryer operates on a maintenance-free, capacitor initiated, brushless motor. It is vandal proof. Available options include a choice of a chrome plated zinc-alloy cover, a white baked-epoxy finish or even a custom color. Select from surface or recessed mounting and 110 or 220 voltage units.

Hands Off

Eliminate cross-contamination

Automatic electronic controls eliminate cross-contamination. Users do not have to touch any contaminated surfaces with just cleaned hands. The infrared sensor quickly activates the motor as hands are placed under the nozzle. The Hands Off dryer automatically shuts off after 90 seconds. The major components of the Hands Off dryer are backed by a 10 year limited warranty with a 2 year warranty on the control assembly and sensor. Options include the die cast cover in chrome or white epoxy and surface or recess mounted models. A tough white Lexan cover is also available in a surface mount model.

XLerator

Drying time reduced by 67%

Hands are dry in one third of the usual time! Ten to 15 seconds and the user is on their way. The “warm air massage” action leaves hands feeling warm, soft and completely dry. The automatic sensor eliminates cross-contamination. Operates on a standard 15 amp circuit. Reduces energy cost by 80% compared to other dryers. The vandal proof, XLerator die cast cover is available in chrome or white epoxy.

Locate the style of dryer on the left; select surface or recess mount on the top; then select the cover color. Where the style row from the left meets the design column from the top you will find the product number of the SSS Hand Dryer. For example a Push Button, surface mounted unit with a white epoxy cover, 110 volts is model 27002.

Style	Surface Mounted			Recess Mounted		Warranty
	Chrome Plate	White Epoxy	Lexan White	Chrome Plate	White Epoxy	
Push Button
