

HD MICROPOWER SYSTEM

HEAVY-DUTY MICROFIBER WET & DUST MOPS

Save Time and Money:

Reduce the amount of chemicals, water, & energy needed to clean

The Heavy-Duty MicroPower Mop System is designed to fit the operator's needs. Microfibers are specially designed non-abrasive, non-linting fibers, small enough to penetrate into surface pores and remove tiny dust particles. HD MicroPower Mops save time and money by using a smaller amount of chemicals and water to clean than traditional mops. To use HD MicroPower Mop Pads, simply apply a clean pad, clean the area, and remove the pad to be laundered. The Velcro backing makes changing mop pads quick and easy, which helps eliminate concerns about cross-contamination from one area to another.

Both wet and dust mop pads have an absorbent core. Wet mop pads are available in four colors for separating by use or area. Use wet, damp, or dry for a variety of tasks. The lightweight handle and frame reduces the strain of mopping and allows easy maneuvering on flat surfaces: clean walls, ceilings, base boards, and windows with one product. The 360° swivel offers a full range of motion. Its telescoping handle accommodates various tasks and heights. Non-marking end caps protect walls and furniture from scratches.

Resilient HD MicroPower Mop Pads can be laundered numerous times. Do not process microfiber pads with any fabric softeners.

Features and Benefits

- Saves time and money
- Reduces chemicals, water, and energy to clean
- Eliminates cross-contamination
- Ergonomic design alleviates the strain of mopping
- Lightweight structure provides easy maneuvering
- Velcro backing makes changing mop pads a breeze
- Environmentally friendly: reduces amount of chemicals circulating in the water supply
- Microfiber is recommended by the U.S. EPA "Best Practices in Healthcare Facilities"
