Established, respected brand with distinctive package design, selling features and bilingual instructions	<ul style="list-style-type: none"> Easier and faster sell-through

PRO SERIES™ 550 SELECT BLEND ICE MELTER

A high-quality blend that works as hard as you do

Specially blended for fast and effective ice melting

While simple blends merely mix different ingredients together in a bag, Select Blend Ice Melter utilizes a unique blending process to ensure the ingredients work together for maximum melting power, even at temperatures as low as 0°F/-18°C.

Simply better than simple blends

Select Blend provides a variety of advantages over simple blends. Most simple blends charge a premium price without providing the results you need. Select Blend, on the other hand, gives you a high-quality, cost-efficient solution with a proven track record. Select Blend won't damage concrete or leave behind a slick, oily residue. Select Blend is also safer for people and pets, as it won't harm human skin or pets' paws.

You need it. You got it. Count on it.

In addition to Select Blend, we have a full line of professional ice melters which are available only in the Jan/San industry. These products are designed to meet your specific needs and price points. With our nationwide availability, we ensure that you get the product you need when you need it. For the best ice melters in the business, look to Safe Step, your ice melting authority.

Our Safe Step® 500 Series offers professional ice melters with proven performance, for dependable results. Safe Step Select Blend Pro Series™ 550 answers the need for a high-quality ice melter that is tried and true in the industry.
