**Tips**
- Knuckle Strap
- Shirred Elastic Back
- Safety Cuff
- Welted Seam
- Full Leather
- Index Finger
- Wing Thumb
- Continuous Pull
- Seamed Back
- Straight Thumb

**Types of Leather**
- **Split**
  - Interior side of the hide
  - Rougher texture than grain
  - Three types of split leather
    - Side Split
    - Shoulder Split
    - Belly Split
- **Grain**
  - External side of the hide
  - Smooth, flexible, and repels liquid
  - Provides dexterity

**Gunn Cut Patterns** are used mostly on leather gloves. Two-thirds of the fingers are covered with leather for more protection and better wear. See illustration.

**Clute Cut Patterns** are most popular for cotton gloves. They are also available as an economical leather glove. See illustration.

**Cuff Styles** vary depending on the needs for specific applications.

**Work Glove Characteristics**

**Canvas** One side of canvas (canton flannel) fabric has a fleeced surface. This fleece is referred to as the "nap". The napped side is usually sewn inside the glove for comfort but some gloves are made nap out for increased wear.

**Leather work gloves**
- 8025 Shoulder Leather Palm Knit Wrist
- 8055 ProGuard® Shoulder Leather Palm 2 1/2" Safety Cuff
- 8054 ProGuard® Shoulder Leather Palm 4 1/2" Safety Cuff
