C&A does not advocate the application of any cleaning solution via the rinse than of an extraction machine

The above listed chemistry has been evaluated for the listed criteria only. No evaluation of cleaning efficacy has been performed.

All cleaning agents shall have the following characteristics:

- Contain NO optical brighteners.
- Shall NOT dry with a sticky or oily residue and must be resoil neutral. Should not contain d'limonene or any lauryl sulfa
- Have a pH between 4 and 9.
- Should NOT damage nylon face yarn or remove/mute color.
- Should not contain a bleaching agent.
- May not alter fiber color in any way.
- Must dry to a crystalline structure that readily shatters for effective removal via dry vacuuming.
