The **Apex Battery Burnisher BB-2** is designed for excellent burnishing productivity. The battery powered burnisher frees the operator from the limits of a power cord. More time is available for burnishing, with less downtime. The 20" pad diameter with a pad speed of 2,000 rpm and pad pressure up to 30 lbs. generates results. The three 215 AH batteries provide up to 4 hours of continuous duty run time. The Apex BB-2 is equipped with a powerful 2.5 hp commercial motor for performance and reliability. The tough roto-molded polyethylene frame delivers ease of use along with the durability to stand up in the toughest working environments.

The Apex BB-2 features a user friendly control panel for easier training and safe operation. The handle adjusts to a comfortable working position and conveniently folds for storage. The passive dust control system is important for enhanced indoor air quality in office, retail, healthcare, school and retail facilities. The Apex BB-2 is an excellent tool for cleaning contractors.
