Specifications are subject to change without notice.

The **SSS Battery Burnisher BB-1** is designed for excellent burnishing productivity. The battery powered burnisher frees the operator from the limits of a power cord. More time is available for burnishing, with less downtime. The 21" pad diameter with a pad speed of 2400 rpm and adjustable pad pressure generates propane-desired results. The 36 volt, three 215 AH batteries provide up to 4 hours of continuous duty run time. The BB-1 is equipped with a powerful 2.5 hp commercial motor for performance and reliability. The structural steel chassis and tough polyethylene cover delivers ease of use along with the durability to stand up in the toughest working environments.

The BB-1 features a user friendly control panel for easier training and safe operation. The handle adjusts to a comfortable working position and conveniently folds for storage. The passive dust control system is important for enhanced indoor air quality in office, retail, healthcare, school and retail facilities. The BB-1 is an excellent tool for cleaning contractors.
