Specifications are subject to change without notice.

The **SSS Stainless Steel Canister Vacuum SC-19** is a highly mobile canister vacuum that gets into tight spots, in and around furniture. The high level air flow efficiently picks up dirt and debris quickly. It is an ultra quiet unit with a sound level of only 55 decibels. It is excellent for use in occupied areas in healthcare, hospitality, schools, conference centers – wherever it is important not to disturb others in the area.

Standard equipment includes a tool caddy with hose, adjustable metal wand, and dusting, upholstery and combination floor tools. The stainless steel tank is both durable and creates maximum air flow for enhanced cleaning performance. Even though it is a compact and lightweight unit, the SC-19 holds 15.8 quarts of dirt and debris for an extended cleaning time between bag replacements. Optional HEPA filter is available.
