Merlin CareMaster Drip System

CareMaster Drip System is an automatic drip cleaning system for tank style toilets. Cleans the fixture and freshens the air. Excellent for small restrooms. Refills provide 24-hour service and are easily changed.

- Consistent (round the clock) cleaning where ever water goes
- Lowers costs to maintain urinals and toilets
- LED signals eliminate guessing
- Refills neutralize malodors and leaves a fresh clean fragrance

ALL FORMULAS ARE ODOR NEUTRALIZERS

Triple S Air Care offers modern fragrances that meet the needs of your restroom patrons.

Your first impression of the restroom is based on the fragrance or odor they encounter. Since even the cleanest restrooms are susceptible to foul odors, an effective air freshening system is essential. Triple S Air Care Systems eliminate unpleasant odors, leaving the restroom with a clean, fresh fragrance.

All Triple S formulas contain Countermax™ odor neutralizers

Most air fresheners only camouflage unpleasant odors. Triple S systems are engineered to do the complete job... we "eliminate the unpleasant odors" in the restroom.

Malodor molecules are large and complex. **Countermax™** is a blend of chemistry and physics that locks on to malodor molecules and transforms them into a neutral base.

OmniAir™ ^{NEW} Continuous Odor Management

- NO Added V.O.C'S
- NO PROPELLANTS
- NO BATTERIES
- Refill components completely recyclable
- Pure fragrance & odor neutralizers
- Promotes a clean & healthy environment

How OmniAir™ works....

The fuel cell creates hydrogen within the fragrance chamber. As each molecule of hydrogen is created it forces an equal volume of fragrance out of the chamber. Natural air flow distributes the fragrance throughout the room.

Products marked with the TRIPLE S EarthCare™ Seal meet recognized green standards or have features that contribute to the preservation and sustainability of a healthy environment.

OmniAir Deluxe: Same effective fuel cell technology with a battery operated fan to distribute fragrance through a room quickly when natural air flow may not be reliable.
