

## Liquid Enzyme Deodorants

### ENZYME DEODORANT

A bacteria/enzyme culture plus deodorant that will digest organic waste, reduce the volume of solids and destroy odors in grease traps, portable toilets, septic tanks, cement vault toilets and waste treatment plants. May also be used as a urine odor eliminator for floors and carpets. Destroys odors associated with the decay of organic matter. Composed of specially bred bacterial spores that actually attack and break down uric acid molecules, it also contains a malodor counteractant that deodorizes during decomposition.

### DRAIN-ZYME

A combination of free enzymes, nutrients and genetically engineered spores designed to quickly digest grease as well as proteins and other organic wastes. These spores continue to grow and degrade grease compounds long after initial usage. A non-acid, non-caustic formula, Drain-Zyme is the safe and cost-effective way to treat drain systems, grease traps, septic systems and institutional floors. Coupled with a powerful deodorant, it deodorizes while digesting organic waste and reducing the volume of solids, including grease, proteins, fats and oils.

### WATER SOLUBLE DEODORANT

The most versatile and economical deodorant in the marketplace containing true odor counteractants, not masking agents. Simply dilute a small amount with water and you can eliminate most odor problems. May also be used in trigger sprayers, extractors or mop water. Safe to use on new generations of stain resistant carpet as it contains no cationic surfactants.

### INDUSTRIAL DEODORANT

Highly effective room deodorizer despite its small size. When the wick is raised and the bottle placed where air circulation is good, all nearby unpleasant odors will disappear. This wick bottle is still the most cost effective way to deodorize an area. The 1.5 ounce bottle will deodorize 1,500 cubic feet for 45-60 days, even under a continuous fan. Can be used with either a passive or motorized cabinet.
