

Achieve Cleaning Management Software Solutions

Achieve Assistant Workloading and ROI Calculator

- An easy-to-use software tool that allows you to determine how many hours and how many employees are required to clean a facility.
- Perform simple staffing requirements and provide labor savings analysis
- Based on ISSA's InfoClean software. Branded for Triple S.
- Designed for the DSC to use with a customer.
- ROI Calculator – customized with Triple S floor and carpet care equipment and production rates

Achieve Pro Cleaning Management & Workloading Program

- A powerful software tool for developing a complete custodial staffing plan that includes labor, work assignments, inspections, and more.
- Based on INFORMED Cleaning Management Software.
- More intensive program; in depth analysis of larger facilities; requires higher level of training
- Multiple Modules: Space Management, Area Types & Tasks, Labor Estimates, Work Assignments, Inspections, Supplies and Equipment Assessment & Inventory Management
- Members will have option to lease the program to their customers and/or for their own use.

Workloading Analysis Service

- Triple S provides the services of a professionally trained Workloading Specialist to fully analyze the workloading requirements of your customer's facility.
- Available on a "square foot" fee basis (see reverse side for price list).
- Our Workloading Specialist will enter all the key facility data provided by the Member Sales Consultant.
- What you provide: measurements of facility, # of fixtures, flooring type, type of equipment, etc.
- What Triple S provides: analysis of space measurements, defined scope of work, assigned tasks per worker, and a labor cost analysis.
