HIGH TOUCH OBJECTS YOU NEED TO CLEAN IN A CLASSROOM

1 SINKS AND FAUCETS

Use a product that cleans AND disinfects so that germs are being killed, not just moved around.

Cleaning this area requires more than just wiping out the sinks themselves. Clean objects around sinks, faucets, and towel dispensers where water and germs may have dripped.

Clean under sink fixtures since many organisms thrive in damp wet environments.

2 KEYBOARDS AND TOUCHSCREENS

Clean using a glass cleaner with a microfiber cloth or disinfectant wipe. Always refer to the label instructions to ensure the proper amount of dwell time to ensure maximum effectiveness.

Keyboards and touchscreens are interacted with constantly throughout the day.

Touchscreens especially need daily cleaning since the relatively warm and consistent heat from screens can aid organism growth.

3

CABINET DOORS AND BOOK SHELVES

Regular daily cleaning of these surfaces will reduce buildup, and will help extend the life of these objects.

Don't overlook cabinets or shelving just because there are no visible stains.

Airborne particles tend to settle on these exteriors. Dust and other soil can buildup over time on these surfaces and provide a potential habitat for germs.

4

DOORKNOBS AND HANDLES

Wipe or spray with a disinfectant cleaner to limit germ buildup.

Doorknobs and handles are the first thing and the last thing most people touch when leaving an area. That means all of the organisms they interacted with can wind up on those doorknobs.

Now multiply that by the number of people that enter and exit each day and you have more than enough reason to make them a part of your daily cleaning checklist.

5

CARPETING

Regular vacuuming is highly recommended, especially with a HEPA certified vacuum to preserve air quality.

Aside from the obvious foot traffic, carpeting can also trap dust from the air, organisms brushed off from other surfaces, and germs from children's hands.

In addition to vacuuming, properly cleaning with a carpet spotter will better limit germ buildup as well as improve the appearance and life of your carpet.
