STEP_{UP} SYSTEM

The Step-Up Dispensing System

The Triple S Step-Up Dispensing System represents a new generation of Quality Skin Care. More product in the same amount of space as old-style bag-in-box dispensers means less time is spent refilling dispensers. Incidents of empty dispensers are greatly reduced.

Hand Hygiene

Pick the capacity, size and configuration to do the job right. Choose 1000 mL or 2000 mL, both are half the size of old fashioned 800 mL units. The smaller design permits greater flexibility and allows ADA-compliant placement anywhere. Easy to install, easy to load and easy to maintain.

Rugged construction unconditionally guaranteed. Refills load in seconds. They slide right into the cabinet with one easy motion. The vacuum action of the dome pump valve empties bag completely. You get a fresh no-clog dispensing valve with each refill. You get twice as much product in the same space as the traditional bag-in-a-box systems.

Quality Skin Care

Refills fit both styles of dispensers. The sanitary sealed refills keep out germs, empty fully and are easy to replace. Free dispensing valve with every refill.

More handwashes...Each push dispenses up to 1.5 mL of liquid soap.
