

High Density HMW-HDPE Value-Based Can Liners

Made with FDA approved HMW-HDPE resins (natural only) using our exclusive manufacturing process

- *Excellent chemical resistance, temperature resistance and odor containment*
- *Seamless tubular construction*
- *Leak-proof star seal*
- *Sizes to fit the industry's most popular receptacles*
- *Wide range of gauges*
- *Available in Natural or Black*
- *Convenient, easy-tear perforation separates liners within the roll*

Market Value HMW-HDPE Can Liners

Value-based Market Value can liners handle heavier loads at a lower cost than competitive bags made from less advanced films. These liners also promote environmental source reduction— thinner, stronger Triple S films mean less waste going into incinerators or landfills.

A great all-purpose, cost effective liner — suitable for heavy, wet, non-sharp trash.

Blended LLDPE Value-Based Can Liners

- High-quality blended resins with up to 70% recycled content
- Great strength, puncture and tear resistance
- Wide range of sizes for tough jobs
- Leak-proof star seal
- Extra heavy-duty use, available from 0.90 to 1.70 MIL
- Available in Black
- Coreless rolls for ease of use and storage

Market Value is a value-based, no-nonsense can liner. This Blended LLDPE liner delivers unbeatable strength and thickness and combines the best in performance and value.

Perfect for cost-conscious users looking for a thick bag suited to heavy duty applications like sharp, heavy or irregular waste. Because it's made from recycled materials, this bag also offers an environmentally sound choice.
